

The graph displays a complex network of connections between various educational institutions. The nodes are labeled with institution names and are color-coded: purple for 'College of Education', blue for 'University', yellow for 'University', green for 'Wananga', and cyan for 'Polytechnic'. The graph is highly interconnected with many edges between nodes.

The graph displays a dense network of interactions between 16 individuals, labeled D00 through D10. The nodes are categorized by sex and color: Males (D00-D10) are represented by yellow circles, Females (D00-D10) by teal circles, and Females (D00-D10) by purple circles. The connections are represented by a complex web of grey lines, indicating a highly interconnected network structure.
