

The diagram illustrates a network of relationships between 20 individuals (D00 to D10) and 15 institutions. The nodes are categorized by gender and institution type. Males (D01-D10) are represented by yellow circles, while females (D00, D07-D09) are represented by purple circles. Females D01-D06 are represented by teal circles. Institutions are represented by squares: yellow for universities, purple for social sciences, teal for health, and light blue for other institutions. The edges represent relationships, with colors indicating the type of relationship: yellow for male-to-male, purple for female-to-female, and teal for female-to-male. The network shows a high degree of connectivity, with many individuals having multiple relationships across different institutions.

The graph displays a complex network of relationships between various institutions and departments. The nodes are categorized by color: teal for Wananga, yellow for Polytechnic, and purple for University. The connections are represented by a dense web of lines, indicating a high degree of interconnectivity between the different entities.
